Test Training Program

The purpose of a Test Training Program is to develop a training program which facilitates the development of knowledge and skills of people so that test tasks and roles can be performed effectively and efficiently - **TMMi Foundation.**

- Establish an Organizational Test Training Capability
  - Identify the strategic test training needs
  - Align the organizational and project test training needs
  - Establish an organizational test training plan
  - Establish test training capability
- Provide Test Training
  - Deliver test training
  - Establish test training records
  - Assess test training effectiveness

Let's discuss

- Methods used for test training

- Training tasks, roles and responsibilities

- Required resources including tools, facilities, environments, and staffing

- Required skills and knowledge of the trainers

- Data to be collected for measuring training effectiveness

- Training commitments to projects

- Anything else?
